List of Journals and other Serial Sources LJ1

SIX-MONTHLY INDEXES TO SCIENCE ABSTRACTS

Cumulative indexes to Science Abstracts are published twice a year covering the period January-June and July-December. They comprise author and subject indexes and some specialised or 'small' indexes. For Physics Abstracts and Electrical & Electronic Abstracts the Author Index and Subject Index are published as separate volumes. In this case the Small Indexes are included in the Author Index volume.

Cumulative Author and Subject indexes for preceding years are also available. For details please see inside back cover.

Author index

This lists in alphabetical order all authors of papers abstracted in the abstracts journal during the six months covered by the index, together with the title of the paper. Where there are co-authors of a paper the title of the paper is given only under the name of the first author. The serial number of the paper in the abstracts journal is in the form 3 - 12345, i.e. 1983—abstract no. 12345.

'Small' indexes

These are specialised indexes which allow the user to find quickly particular types of information which might be difficult to find using the subject or author indexes.

Bibliography index

In this index reference is made to articles which contain a significant list of references or bibliography on the subjects listed.

Book index

This gives details of books received and abstracted by the abstracts journal.

Conference index

This index lists conferences for which published proceedings have been received and abstracted. Reference is given to the individual papers and their serial numbers in the abstracts journal.

Corporate author index

This is an index to those items where a corporate organisation rather than an individual person is the agent primarily responsible for the publication. Such publications typically include reports of industrial firms or of government departments or research establishments.

Subject Index

The Subject index provides an alphabetical subject key to the articles included in the abstracts journal. Some general guidance on its use is given below:

1. Look in the index for the name of the specific subject in which you are interested. In most cases this name will be a heading in the index and you will find relevant articles listed under it. The majority of the subject headings fall into the following catagories: property, phenomena, substance or named objects, instrument, device, theory, method, process, application, event.

2. Occasionally you will be directed from the subject heading chosen to a different heading under which the relevant or additional articles are listed.

3. If you do not find the subject heading you first chose, try a more general heading.

4. Each entry under the heading relates to an article appearing in the abstracts journal and gives the serial number of that article in the journal preceded by the last digit of the current year, e.g. 3 - 12345; i.e. Abstracts number 12345 in the abstracts journal of 1983.

The language of the article, if it is not in English, is also indicated, e.g. CAD/CAM for sheet metal parts (Japanese) 3 - 22450.

Each entry starts with a Keyword or Keyphrase considered to be most relevant to the heading.

There are two main Keyword lists; numerical 1-9 and A-Z. More than one Keyword list may be present under each subject heading.

Computer & Control Abstracts

Science Abstracts Series C

January–June 1983

Author & Subject Index

Computer and Control Abstracts is published monthly by the Institution of Electrical Engineers. Twice-yearly subject and author indexes covering the period January-June and July-December are included in the subscription. Postmaster: Send address changes to INSPEC/IEEE Service Center, 445 Hoes Lane, Piscataway, NJ 08854. Second class postage paid at Piscataway, NJ 08854, USA. Printed by Pindar Print Limited, Scarborough, N. Yorkshire, England

Errata

Entry 18422 of July 1981 citation should read Siemens Rev. (Germany) vol. 48, no. 1, Jan-Feb 1981

Entry 41 of January 1982 citation should read Siemens Rev. (Germany) vol. 48, no. 4, July-Aug 1981

Entry 10599 of April 1982 citation should read Siemens Rev. (Germany) vol. 48, no. 5, Sept-Oct 1981

Entry 19155 of June 1982 citation should read Siemens Rev. (Germany) vol. 48, no. 6, Nov-Dec 1981

Entry 23843 of July 1982 citation should read Siemens Rev. (Germany) vol. 49, no. 1, Jan-Feb 1982

Entry 39621 of November 1982 citation should read Siemens Rev. (Germany) vol. 49, no. 3, May-June 1982

Entry 41812 and 43665 of December 1982 citation should read Siemens Rev. (Germany) vol. 49, no. 4, July-Aug 1982

Entries 41319, 41668, 41811, 41871, and 43906 of December 1982 citation should read RAIRO Autom./Syst. Anal. & Control (France)

Entries 1506, 1541 and 1562 of January 1983 citation should read RAIRO Anal. Numer. (France)

Entries 8916, 8917, 8937, 8968 and 8969 of March 1983 citation should read RAIRO Anal. Numer. (France)
